

ABRASIVES

Cutting Wheels

Gazelle cutting wheels are pre-engineered to produce the most versatile wheel performance. They are engineered to give you optimum to premium performance in all cutting applications ranging from production to maintenance.

Application / Market

- Notching
- Sheet metal Cutting
- Pipe Cutting (Cast Iron / Stainless Steel / Mild Steel)
- Foundry Gate / Riser Removal
- Metal Plate Dimensioning
- Bar Cutting
- Sample Cutting
- Rail Cutting

Features

- Reinforced cut-off wheels
- OSA certified products adhering to European safety standards

Benefits

- Designed to resist breakage caused by severe cross-bending
- A reinforced wheel is required on any operation where the work is not securely clamped

METAL CUTTING

PORTABLE MACHINES		SIZE		SPEED

Ultra Thin Wheels

Application / Market

- SS sheet cutting
- Tube cutting
- PCB cutting
- Dairy industry
- Investment castings

Benefits

- High Cut rates in view of low thickness
- Job Material savings because of low thickness
- Lower power consumption
- Enhanced machine life
- Minimum burr generation while cutting
- Double reinforced to provide safety

MODEL	SIZE (DIA x THK x BORE)	STD PACKING	SPEED RPM
GTD100	100 x 1 x 16 mm	100 PCS	15300
GTD115	115 x 1.2 x 22 mm	100 PCS	15300

Grinding Discs

Portable grinding is a process where the grinding machine is held by the operator. Weld grinding and notching are usually portable grinding applications performed with Type-27 portable grinders.

Application / Market

- Chemical & process grinders
- Pipe manufacturing industry
- Grill manufacturing industry
- Dairy industry
- Storage tank fabrication
- Plate / angle iron fabrication
- Petrochemical maintenance
- All weld grinding
- Ship building
- Foundry gates and risers
- Pipeline notching and beveling
- Removal of irregularities on steel rolled flats.

Features

- Unique product segmentation tested against
- stringent safety OSA certified products adhering to European safety standards

Benefits

- Products available to suit the most common applications across different customer segments.
- The safest product in an application where a faulty wheel can be fatal

METAL GRINDING

Multipurpose Steel Cutting Discs - Ultra

Get a longer lasting cutting edge that resists wear-and-tear with densely packed aluminium oxide grain structure built tougher to maintain razor sharpness for up to 50% longer life. Suitable for cutting metal sheets, profiles, and cast iron, the GAZELLE multipurpose steel cutting discs are optimised for your industrial applications.

Features

- High-performance multipurpose discs for industrial applications
- Suitable for cutting metal sheets, profiles, and cast iron
- High endurance blade designed for longer life and improved efficiency
- Densely packed aluminium oxide grain structure

Metal Grinding Wheels - Ultra

Crafted from high-performance aluminum oxide grain for durability and optimal material removal, the GAZELLE GMG Ultra Metal Grinding Wheels Series grind and shape a variety of metals. Best suited for surface grinding, welding seams, and weld grinding.

Features

- General purpose wheels for steel applications
- High material removal rate
- Suitable for surface grinding, welding seams, and weld grinding
- Densely packed aluminium oxide grain structure

METAL / STEEL CUTTING

Stainless Steel Cutting Discs - Ultra

Built to cut high performance stainless steel materials, the GAZELLE Stainless Steel cutting wheels can be used for all your industrial stainless steel cutting applications. Free of iron, sulfur and chlorine for contaminant free cutting.

Features

- Designed for fast and burr free cutting of stainless steel materials
- High endurance blade designed for longer life and improved efficiency
- Free of iron, sulphur and chlorine for contaminant free cutting

Flap Discs - Aluminium Oxide

Gazelle flap discs are engineered for multiple applications including light stock removal, blending and finishing, meaning they can help reduce process times and lowers cost. Flap discs have a fast cut and provide a better finish than fibre, while having the added benefit of a longer life.

Application / Market

- Stock removal
- Edge chamfering
- Deburring on CRCA sheets
- Rust/paint removal
- Cleaning & finishing of metal surfaces
- Grinding & blending welds

Features

- High performance, proven ALO abrasive grain
- Stiff synthetic backing
- Premium aluminum oxide grain
- Strong bond system
- Tough reinforced glass fiber backing

Benefits

- High cut-rate
- Optimal Stock removal through out the disc life
- Quiet, free of vibrations
- Low dust due to abrasive cloth fraying

Flap Discs - Zirconium Oxide

Gazelle flap discs are engineered for multiple applications including light stock removal, blending and finishing, meaning they can help reduce process times and lowers cost. Flap discs have a fast cut and provide a better finish than fibre, while having the added benefit of a longer life.

Application / Market

- Stock removal
- Edge chamfering
- Deburring on CRCA sheets
- Rust/paint removal
- Cleaning & finishing of metal surfaces
- Grinding & blending welds

Features

- Hard-wearing, long service life
- Especially suitable for stainless steel also great for mild steel
- Designed for use with all 115mm (4.5") angle grinders
- Ideal for use on wood, metal and plastic

Benefits

- Excellent performance on stainless steel & alloy
- Less pressure for aggressive stock removal and long life
- Maximum contact with work surface without loading

Flap Wheels with Spindle

Flap wheels are conformable to intricate shapes and contours. Designed to deliver a consistent finish with a uniform rate of cut, flap wheels wear away evenly and without residue, continually exposing fresh abrasives. Flap wheels with 1/4" shank and aluminum oxide A grain are universally suitable for all materials.

Application / Market

- Blending, deburring and finishing
- Metal fabrication, welding and polishing
- For straight shaft grinders or drilling machines

Features

- High flexibility
- High stock removal due to aggressive coated abrasive.
- Flaps wear off uniformly and without residue on the work piece surface, exposing fresh, sharp abrasive grain at all times.
- Due to the special cast core construction, the face of the tool can be worked very close to edges and corners

Fiber Discs - Aluminium Oxide

From rapid weld grinding to blending and finishing, Gazelle has a complete range of high performance fibre discs available in premium performance aluminium oxide abrasives. All fibre discs in the Gazelle range feature a full resin bond system with heavy duty fibre backing for increased strength, durability and tear resistance.

Application / Market

- Material removal
- Weld grinding & blending
- Light deburring & finishing
- Automotive manufacturing
- Metal fabrication
- Welding & foundry markets
- Transport markets

Features

- Treated aluminum oxide abrasive
- High strength backing
- Unique coating process

Benefits

- Consistent cut rate, uniform high quality surface finish, tear resistant, no breakage during operation
- Resistant to grain dulling, cooler cutting

Velcro Discs

Gazelle Velcro discs are made from light-weight paper and are the performance leader in dry finishing. Typical applications include preparing primed and painted surfaces for finishing, stripping primer and paint, sanding plastic and fiberglass and bare wood sanding.

Application / Market

- Automotive Refinishing
- Construction & Decoration
- Wood Processing
- Composites Processing
- Marine Industry
- Vehicles Manufacturing

Features

- Premium P-graded, heat-treated aluminum oxide abrasive for superior life, fast cut rate, and consistent finish
- Unique fiber-reinforced, c-wt latex-saturated backing provides a 50-60% improvement in tear strength.
- Water-based stearate, non-pigmented, No-Fill coating provides maximum load resistance and extended life with no color transfer to work

Benefits

- Consistent cut rate, uniform high quality surface finish, tear resistant, no breakage during operation
- Resistant to grain dulling, cooler cutting

Velcro Net Discs

Gazelle velcro net is a revolutionary abrasive material offering dust free sanding with no clogging. The open mesh design features thousands of tiny holes which will make sure that when used with suitable extraction the passage of dust will be incredibly efficient. It is highly durable and can last twice as long as many conventional abrasives making it a cost-effective solution.

Application / Market

- Decorative Finishing
- Woodworking
- Automotive Industries

Features

- An incredibly efficient long lasting abrasive
- Open mesh design eliminates clogging
- Dust free sanding when used with extraction
- 150mm diameter

Waterproof Sanding Sheets

Gazelle waterproof silicon carbide resin bonded paper, more commonly known as wet & dry sheets are used primarily in automotive body work. Finer grades can be successfully used for final preparation and between coats of varnish/paints and is pre-eminent in achieving a supreme result when polished with oil. It is often used on top of a solid flat surface to sharpen edge tools, the addition of a little water lubricates and prevents the paper from slipping.

Application / Market

- Can be used as wet or dry in metal, wood, vinyl & other hard surfaces like wall or floor
- Removing old paint
- Cutting down filler and conditioning
- Feather edging
- Cutting down plastic filler and conditioning
- Top coat & lacquer acrylic
- Cutting down wood surface
- Top coat / clear lacquer

Features

- Flexible sanding sheets, anti slip coating ensures good handling.
- High performance Silicon Carbide, closed coat waterproof sanding sheets with a resin over resin bond.
- Electronically coated paper sheets have been treated with a waterproofing agent to permit usage on wet and dry applications.
- Environmentally stable and resists wet- and humidity-caused curling.
- Each pack contains 50 Wet/Dry Sanding Sheets.

No Fill Dry Sanding Sheets

Gazelle Dry Paper is a white colored, semi open stearate coated resin bonded product with C-WT backing. It gives superior surface finishing on flat surfaces. The sheets are used for refinishing, preparation and de-nibbing. Suitable for all woods, fillers and particularly suitable for processing finish coatings.

Application / Market

- Used dry in wood, vinyl & other hard surfaces like wall or floor
- Refinishing paint coated surface
- Cutting down filler and conditioning
- Feather edging
- Cutting down plastic filler and G. conditioning
- Top coat & lacquer acrylic
- Cutting down wood surface
- Top coat / clear lacquer

Cloth Rolls

Gazelle cloth rolls are for general purpose metalworking applications. The Flexible J-WT Cloth backing and P-graded premium ALO grain insures longer life and better stock removal. Gazelle Cloth Rolls are designed for fast and easy sanding of various surfaces, and can be torn to exact lengths as needed. Handy rolls are packaged in a protective, convenient dispenser which eliminates costly waste and permits neat, easy storage.

Application / Market

- Light Deburring
- Removing rust & scale
- Sanding & Polishing
- Bare wood sanding

Features

- High flexibility
- High stock removal due to aggressive coated abrasive.
- Flaps wear off uniformly and without residue on the work piece surface, exposing fresh, sharp abrasive grain at all times.
- Due to the special cast core construction, the face of the tool can be worked very close to edges and corners

Bonded Abrasives

Gazelle Mounted Points are manufactured by premium Aluminum oxide grains when initial price is the main consideration for blending contours, debarring molded parts, ID grinding, offhand bench grinding, and tool and die applications. These vitrified bond A & 38A abrasive mounted points are representing value for the user who wants superior quality products with consistent performance at a low initial price.

Features

- Pink ALO abrasive is cool cutting, less burn
- Diverse shapes and sizes
- Ideal when initial price is the main consideration
- Great choice for small job shops
- Standard shank dia is 6mm

BONDED ABRASIVES		
MODEL	MM	COLOR
A11- 35A-C	A11/ 21 X 45MM	ALO PINK
A3/PM	A3 x 6mm	ALO PINK
A5/2028	A5/20 X 28MM	ALO BROWN

Marble / Granite Blades

The Gazelle product line contains a wide range of diamond blades suitable for many different applications, in sizes ranging from 100mm to 230mm diameter, for use with portable angle grinders and small tile saws. When choosing a diamond blade it is important to carefully consider the material which needs to be cut. Using the blade for its specific purpose prolongs the life and cutting speed.

MODEL	SPECIFICATIONS
GMG100	100MM / 4 in
GMG115	115MM / 4.5 in
GMG180	180MM / 7 in

Concrete Blades

Features

- Segments are laser welded for enhanced performance
- For cutting all types of marble & hard granites
- Withstands high temperature
- For dry or wet cutting operations
- Can be used in angle grinders, circular saws, tables saws, bridge saws and tile saws.

MODEL	SPECIFICATIONS
GGP100	100MM / 4 in
GGP115	115MM / 4.5 in
GP180	180MM / 7 in
GXP230	230MM / 9 in

Tile Blades

These diamond blades have been specifically designed for cutting ceramic and stone tiles. When working with these materials the quality of cut is extremely important and a continuous rim diamond blade is most effective. The continuous rim is designed to achieve a smooth and fine edge.

Features

- Designed for cutting ceramic and stone tiles
- Continuous rim gives a good quality cut
- Continuous rim blades can be used wet or dry, but using wet is advised to achieve the ultimate cut.

MODEL	SPECIFICATIONS
GRT100	100MM / 4 in
GRT115	115MM / 4.5 in
GRT180	180MM / 7 in
GRT230	230MM / 9 in
GRT350	350MM / 14 in

Ultra Thin Tile Cutting Blades

Features

- Designed for cutting through brittle natural stones like medium to soft marble and onyx.
- Thinner blades resulting in faster, safer, and chip-free cutting of fragile materials.

MODEL	SPECIFICATIONS
GXT100	100MM / 4 in
GXT115	115MM / 4.5 in

Bench Grinding Wheels

Bonded abrasives contain abrasive grains held together in a matrix of glass, resin, rubber, or other binders. They are used to remove surface materials such as metal, ceramics, glass, plastics, and paint. Bonded abrasives are used in both grinding wheels and abrasive stones or sticks.

Features

- Bonded abrasives contain abrasive grains held together in a matrix of glass, resin, rubber, or other binders.
- They are used to remove surface materials such as metal, ceramics, glass, plastics, and paint. Bonded abrasives are used in both grinding wheels and abrasive stones or sticks.

ELP180	180mm - 7in

Core Bits

Gazelle diamond core drill bits are designed to meet the demands of more and more core drilling applications right on the job sites. These core bits are used for high speed drilling and in a wide range of building materials. Using water to cool down the bit is highly recommend to ensure maximum life.

Features

- For fast drilling of holes in concrete, asphalt, hard brick and block.
- The high diamond concentration ensures excellent footage and cutting speed.
- Laser welded segments provide strength and durability

MODEL	SIZE
DCS-14	14 x 450mm
DCS-16	16 x 450 mm
DCS-20	20 x 450 mm
DCS-22	22 x 450 mm
DCS-25	25 x 450 mm
DCS-32	32 x 450 mm
DCS-40	40 x 450 mm
DCS-52	52 x 450 mm
DCS-62	62 x 450 mm
DCS-77	77 x 450 mm
DCS-102	102 x 450 mm
DCS-127	127 x 450 mm
DCS-152	152 x 450 mm
DCS-200	200 x 450 mm
DCS-250	250 x 450 mm
DCS-ADAP	Adaptor 1-1/4 & 1/2 to Hilti

Sharpening Stones

Combined dressing stone, coarse in one side, fine on the other. Scissors or scythe , these stones have the right grain for every type of metal. Very fine stone for delicate operation. Ideal for working on the sharp edges of stove and floor tiles..

Application / Market

- Sharpening of carpentry tools , knives , scissors , etc.
- Mould and die polishing
- Debarring
- Offhand dressing of grinding wheels
- Core files used for easy cleaning of rough castings
- Gera debarring
- Edge honing of cutting tools

SHARPENING STONE			
MODEL	SPECS	GRIT	LENGTH
GCSTN6	37 C	150 X 50 X 25	6" X 2" X 1"
GCSTN8	37 C	200 X 50 X 25	8" X 2" X 1"

Grinding Cups for Stone

For grinding the surfaces of natural and synthetic stone with a high removal rate. Available in a very fine medium coarse. The high removal rate of these conical abrasives makes them the ideal solution of coarse grinding work .

Application / Market

- Cleaning of shutter boards.
- Grinding away of concrete ridges after the removal of the form work

GRINDING CUPS FOR STONE
