

Non Contact Voltage Detector, 1000V

G9300 Series - G9301-II

The GAZELLE G9301-II Non-Contact Voltage Detector is easy to use just by just touching the tip to the cable, electrical outlet, or supply cord. When the tip red light is ON and the unit beeps, a voltage is present. Best for electricians, maintenance technicians, safety officers, and anyone who needs to quickly check if the circuits are energised in the workplace or at home.

- Loud audible sound alarm and red-light alert upon live cable detection
- CAT IV 1000V for added protection
- Wide sensitivity range with detection from 90 V to 1000 V AC

Standard Accessories

- Operating Manual
- Batteries

Specifications	Range
AC Voltage (Low)	24V - 1000V
AC Voltage (High)	90V - 1000V
Frequency (Hz)	50/60Hz
Power	1.5V batteries (R03) × 2
Operating Mode	Automatic Induction
Spotlight Flashlight	White spotlight
Audible (buzzer) and visual (LED) indication	√
Auto power off	About 5 minutes
Low battery indication	√
